## The Knock-out Blow.

The blow which knocked out Corbett was a revelation to the prize fighters. From the earliest days of the ring the kneck-out blow was aimed for the jaw, the temple or the jugular vein. Stomach punches were thrown in to worry and eary the fighter, but if a scientific man had told one of the old fighters that the most vulnerable spot was the region of the stomach, he'd have laughed at him for an ignoramus. Dr. Pierce is bringing home to the public a parallel fact; that the somach is the most vulnerable organ out of he price ring as well as in it. We protect our heats, throats, feet and lungs, but the solar had we are utterly indifferent to, until disched finds the solar plexus and knocks us out. ## TAYLOURS AND SMYTHS.

They Were the Commonest Trades In the Thirteenth Century.

The manufacture of leather in the thirteenth century seems to have been important, showing that leather jerkins and breeches were commonly worn. We have 19 skynners, 40 barkars, 6 saddelers, 3 cordeweners, 167 souters (shoemakers) and 8 glovers. The surname feuster is a trade name denoting a maker of pack saddles.

The commonest trades are taylour and smyth, since one lived in almost every village. The taylours number 407, of whom 140 are called by the Latin name of cissor. In addition to 261 smyths, several are specialized. There are two arusmyths, three lokesmyths, three goldsmyths, five fferours (shoeing smiths) and six marshalls (far-

The arkwryght made the great arks or chests in which the clothes or meal were stored, and we find a plowwryght, a wheelwryght, guest. two shippewryghts, eleven cartwryghts and two glasswryghts (glaziers), who were probably concerned with the windows of churches. General John S. Mosby, the Confedcomic incident which happened in the Shenandoah valley in 1864. Near Milland went off in the neighborhood to get something to eat. He rode up to a cabin on a farm in the dark and called for the person inside to come out.

A negro woman, known at that time as an intelligent contraband, opened the door and asked him what he wanted. The soldier wished to be assured of his safety before dismounting and while eating his supper, so he inquired of the woman if any one but berself was there.

She replied, "Yes; Mosby is here," "What!" said he in a whisper. "Is

Mosby here?" "Yes." she said; "he is in the house." The soldler put spurs to his horse and dashed off to his company to carry the news. When he got there he informed the colonel that Mosby was in a house not far away. The regiment was soon mounted and went at a fast trot, thinking they had Mosby in a

Then don't worry about indigestion or dyspepsia; but take Kodol occasionally at the times when you need it, and your food will be digested completely; but don't diet and don't deny yourself the food you like, for dieting is unnecessary; it is wrong to be hungry.

Food is fuel for the body. It furnishes blood, bone, health and strength; but it must be digested first, and you are not going to be healthy or strong as long as your stomach fails to do its work.

know the body requires a variety of it and that which you don't eat may be the very thing you need to supply the necessary strength for your body.

We say eat what you want and let Kodol digest it.

Nor do you have to take Kodol all the time; you

Don't fear to eat the food you like for as you

wouldn't want to have to take it all the time. Take it just when you need it, and in that way allow it to help the stomach to get strong and well. But when you do eat what you want and what you like best, he sure that all the food is digested; you must be sure that the stomach is able to digest it.

Else that portion of the food, which remains in the stomach undigested, irritates the stomach lining, and that is what causes pain. Then again undigested food ferments in the stomach and that is what causes sour risings, gas and belching.

Eat a sufficient amount of good, wholesome food you can't do it by starving yourself. Weakening the body is not strengthening the stomach. Yet you do weaken the body when you deny yourself some article of food you find does not agree with

And here is where Kodol is so effective. It di-gests what you eat and does it completely. It en-ables you to eat just what you like and just what your appetite demands.

Kodol doesn't simply digest certain kinds of food— it digests every kind of food. It acts as Nature acts and it assists Nature in assimilating the food it helps Nature get out of the food what there is in it—strength, blood, bone, muscle and life.

Kodel is for you. Kodel is for anyone and every-one who needs it and we want you to try it now and be convinced that you can eat just what you like if you will only let Kodel digest for a time that which you do eat.

# A STORY OF MILLIONS.

The Way One Man Had a Fortune

Thrust Upon Him. A story is told of how the reluctant giving of a promissory note by a pennic less New York lawyer brought a fortune into his pocket amounting to several millions. The man referred to, John M. Bixby, went to New York in 1830 from a backwoods district as a half starved lawyer. To pay \$4 a week for board and washing kept him on the verge of bankruptcy. He struggled on for a year or two and was constantly seeking odd jobs outside of the law to enable him to exist when a friendly. lawyer in whose office he had desk

room called him aside one day. "Here is a chance for you, Bixby," said the lawyer. "I have an estate to settle and must get rid of the farm on the north side of the city. It is appraised at \$200. You can have it at

that figure." "I have not a dollar to my name," exclaimed Bixby. "You can give me your note, and I will renew, it until you get ready to

pay it," replied the lawyer. The young man hesitated for some time. He was very nervous about placing himself under obligation for so large a sum, but finally consented. Young Bixby had to ask for the renewal of his note two or three times, had to deprive himself of the necessities of life to hold the farm until the opening of the Erie canal and the first lighting of the city by gas gave the metropolis a new birth and his farm was quickly swallowed in the growth. At the time of his death Blxby's property was worth \$7,000,000. Today its market value is more than \$13,000,000. -National Magazine.
